- a. mosquito control b. irrigation control c. brown patch control

3. Why should you provide us with your email address?

- a. request services b. view invoices c. both A and B

SEND YOUR ANSWERS TO OUR MAIN OFFICE AT:

Mail: 1631 Gibbs Dr. • Gainesville, GA 30507
E-mail: info@kinggreen.com Fax: (770) 536-9003

PLEASE PRINT:

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

E-mail: _____ Phone: _____

Congratulations! Listed below are the round 2 newsletter winners:

Stan Hodges ~ Marietta, GA

Kathleen Magnusson ~ Atlanta, GA

Devon Forsyth ~ Cumming, GA

Sandra Horton ~ Terrell, NC

Refer A Friend

Did you know that our number one source of new customers is by referral? Most of our clients are referred by our current customers.

For each new referral that starts a **King GREEN** program, you both receive \$25 towards any **King GREEN** service. There is no limit, so you can refer as many of your friends and family as you'd like.

We'd love the opportunity to provide your family and friends with the same great service you've grown accustomed to. We are grateful that you take the time to share **King GREEN**.

Are Mosquitoes Bugging You?

TAKE BACK THE OUTDOORS!

King GREEN provides an effective solution for controlling mosquitoes in your outdoor living areas. In addition to making your summer itchy and uncomfortable, mosquitoes can spread a variety of diseases that can affect humans and pets. They have even been known to carry heartworms (yuck)!

Give us a call for our introductory special.

The Shade Tree Gazette

Turf Talk

WOW, it's summer already! It feels like just yesterday we were praying for warmer weather. Winter weeds such as chickweed have been replaced with more difficult summer issues like nutsedge and dove weed. **King GREEN** will be spot spraying those weeds and applying the appropriate products to keep your lawn looking its best. To top it off, diseases like dollar spot and brown patch are here now too. But fear not, our fungicide programs are very effective for brown patch, dollar spot and zoysia patch. If you ever have any questions or concerns with your lawn, please let us know.

A growing trend in our industry is protecting your outside living areas from mosquitoes. **King GREEN's** goal is to make your life as easy and comfortable as possible. By adding our mosquito program, we will control those pesky blood suckers where you need us to. With careful application (only where needed), we are able to minimize the effects on the environment, while still providing effective mosquito control. Give us a call for our introductory special.

We need your email addresses! If you haven't already, please visit **www.kinggreen.com** and click on **MY ACCOUNT** to register today. From here you can request services, send us a message as well as view and pay invoices.

Lastly, I'd like to share a photo of my grandson, Francisco Avery Jorge. His happy and fun-loving personality brings pure joy to all of our lives. I could not wish for anything better, except more grandchildren! Thanks again for your business and your referrals. Organic growth through word of mouth is our livelihood and without all of our satisfied customers, we would be nowhere. We love you and may God bless you in all that you do.

Your Friend,

Charlie

About This Service

Today we applied our early summer application to your lawn. Cool-season (fescue) lawns got spot sprayed for weeds and also received an application of Diamond Grow™ Humic Acid, an organic all natural humic acid. The application of humic acid is a fast-acting product that will help fescue grass utilize the minerals available to it in a more efficient manner and also improve soil conditions over time.

Warm-season grasses (bermuda and zoysia) got spot treated for weeds and received a fertilizer blend consistent with weather and temperature.

DID YOU RECEIVE A TREE AND SHRUB APPLICATION TODAY?

The tree and shrub application today consisted of insecticide to control any young insects that might be hatching and a miticide as needed. A fungicide was applied for disease control and should keep your shrubs looking their best for the next six to eight weeks.

DID YOU RECEIVE A MOSQUITO APPLICATION TODAY?

Our mosquito treatments will be effective for 3 to 4 weeks. Between treatments, be sure to keep an eye out for standing water which can be a hot spot for mosquitoes.

King GREEN uses only the most environmentally responsible products available. It is our policy to minimize all pesticide use. For this reason, we'll evaluate the landscape during each visit and spray only the plant material that needs spraying.

THANK YOU FOR USING KING GREEN.

Employee Spotlight

JENNIFER SUTTON

In this issue, we would like to take a few minutes to get to know **King GREEN** employee Jennifer Sutton. For over 15 years, Jennifer has been doing a little bit of just about everything at **King GREEN**. She delivers customer service, does data entry, and also handles correspondence with the Department of Agriculture in order to ensure regulatory compliance when it comes to pest and mosquito control.

At a time in her life when she needed an employer that was flexible and understood work/life balance, Jennifer found **King GREEN**. In 2003, Jennifer and her husband Tim were in the process of adopting a 7-year-old boy (Allen). With **King GREEN**, she found a company that respected the needs of a new mother with a growing family. Today, Allen is serving in the Army in Iraq, and Jennifer still appreciates **King GREEN's** flexibility.

These days, Jennifer's family responsibilities revolve around motorcycle drag racing. On any given weekend, you will likely find Jennifer acting as 'track wife' and 'track mom,' as well as her official title as Tim's crew chief. Given her passion for racing, it is fitting that she was at the track when I called her on a Thursday afternoon for this interview. She absolutely loves the machines, the competition and the community that go along with motorsports and is grateful that **King GREEN** continues to be so accommodating since race weekends begin on Thursdays. Jennifer and Tim's long-range plans include retiring to St. Augustine where they can race year-round in the warm Florida sun.

Become A Pit Master

If you have ever tasted perfectly tender baby back ribs or savored a smoky brisket, you might easily assume that preparing these foods requires some degree of magical power. Transforming raw meat into candy-like goodness can seem nearly supernatural. The good news is that with the right equipment, patience, and creativity, anyone can become a pit master.

While every BBQ enthusiast has their own nuances that they swear by, the overall principle behind BBQ is simple: When cooked at low temperatures over an extended period of time, lesser quality cuts of meat will become tender and delicious.

To pull this off requires a cooker where the meat can receive low amounts of indirect heat. The idea is to heat the meat enough to release its natural juices, but not so hot that the meat dries out. Many 'smokers' exist and range greatly in terms of cost and complexity, but they all essentially work the same way and most use charcoal as the primary fuel source. Wood chunks or chips are usually added during cooking to give the meat the signature smoky flavor.

If you do not want to commit to a new piece of equipment, it is also possible to barbecue on a traditional charcoal kettle grill. With the basics covered, you can start experimenting with different meats, seasonings, and methods. You will be amazed at the wide range of textures and flavors you can create with a few tweaks here and there. Before you know it, you will be turning out world class BBQ that your friends, family, and neighbors will all appreciate!
