Turf Talk

It is with a tremendous amount of love and happiness that I introduce my beautiful niece, Eleanor Rose Oakes, daughter of my sister Amber and her husband, Derek. Born March 9, 2020, she was 7 lbs., 6 oz. and 19½ inches long. The new family of three is doing great! Amber runs our Human Resources department at **King GREEN** and also assists tremendously in our financial department. While her presence has certainly been missed, she's right where she needs to be, with Eleanor, taking in all the firsts at home!

As some of you may know, Amber and I were born into **King GREEN**. Our father Charlie started **King GREEN** in his basement in February of 1987, just months after I was born. He took a risk starting his own business so that we could have much more than he and our mother did. They taught us how to be kind, gracious people and to help others when we could. They instilled a perseverance and true strength in us. I am striving to raise my children to be kind and strong as well. We talk about gratitude in our daily lives, and we surround ourselves with the people that mean the most to us. As I watch Amber and Derek enter into parenthood, I cannot wait for the days of our families being together, our children playing and enjoying the life that we have been given!

Congratulations, Amber and Derek. We are very excited to welcome Eleanor to the **King GREEN** family!

Sincerely,
Jennifer

<i>John Groskopf, GA</i>	<i>L & D Whittington, GA</i>
<i>Brian Mosley, GA</i>	<i>Brian Korinko, NC</i>

Manage Your Account Online!

We want to make being a **King GREEN** customer as easy as possible.

For this reason, we have updated our website so that you can manage your account online. You can add services, schedule payments, and view your history all in one spot.

Visit KingGreen.com to access your account. Click on "My Account" in the top right corner. Once there, you can:

- Prepay for your annual services or pay current balances
- View a history of applications and recommended services

If you have been pleased with your **King GREEN** service, we would love for you to share your experience online.

About This Service

Today, we applied our early summer application to your lawn. Cool-season (Fescue) lawns got spot-sprayed for weeds and also received an application of Diamond Grow™ Humic Acid, an organic, all-natural humic acid. The application of humic acid is a fast-acting product that will help Fescue grass utilize the minerals available to it in a more efficient manner and also improve soil conditions over time.

Warm-season grasses (Bermuda and Zoysia) got spot-treated for weeds and received a fertilizer blend consistent with weather and temperature.

The threat of disease is very high during the summer months.

Extreme heat and humidity combined provide an ideal environment for diseases to develop. **King GREEN** offers both preventative and curative fungicide programs at an extra charge. If you have any questions, please give us a call.

DID YOU RECEIVE A TREE AND SHRUB APPLICATION TODAY?

The tree and shrub application today consisted of insecticide to control any young insects that might be hatching and a miticide as needed. A fungicide was applied for disease control and should keep your shrubs looking their best for the next six to eight weeks.

DID YOU RECEIVE A MOSQUITO APPLICATION TODAY?

Our mosquito treatments will be effective for 3 to 4 weeks. Between treatments, be sure to keep an eye out for standing water, which can be a hot spot for mosquitoes.

King GREEN uses only the most environmentally responsible products available. It is our policy to minimize all pesticide use. For this reason, we'll evaluate the landscape during each visit and spray only the plant material that needs spraying.

THANK YOU FOR USING KING GREEN.

Employee Spotlight

ANTHONY CHASTAIN

Let's take a few minutes to get to know Anthony Chastain, the Assistant Branch Manager at **King GREEN's** metro Atlanta location.

Anthony has been with **King GREEN** for five years. He arrived here upon the recommendation of his brother-in-law, Tony Cohran, who manages our McDonough branch. Once Anthony was able to experience the quality of work **King GREEN** performed and the type of employer he would be working for, he was sold for life.

Working at the Atlanta location is a continuous stream of entertaining and memorable experiences. Anthony loves looking forward to what each day might bring. He also looks forward to working with and for such a great group of people.

During his downtime, Anthony loves spending time with his family. He, his wife Megan, and his four children (Makaiya, Lochlan, Aedynne and Celtigh) enjoy watching movies, playing video games and watching Tik Tok together. Anthony also enjoys woodworking when he has a moment alone.

'Skeeter-Free Summer

Few things can ruin summertime fun like a barrage of annoyingly itchy mosquitoes. These pests are programmed to hone in on humans as their favorite source of food. They also enjoy being out and about in the cooler summer evenings, just like we do.

The best way to prevent mosquitoes is to make your property an unlikely breeding ground for them. Warm weather plus standing water will make your backyard a mosquito hot spot. Removing potential containers for rainwater, such as empty flower pots, clogged gutters, and children's toys, greatly reduces mosquitoes' opportunity to thrive. Addressing your lawn's drainage issues rids your property of the swamp-like setting that mosquitoes love.

While mosquitoes love standing water, there are certain plants that they do NOT like. Marigolds, rosemary, and basil are repellent to mosquitoes. Planting flowers and herbs such as these around your outdoor sitting areas creates a natural barrier that mosquitoes are hesitant to cross.

If basic prevention isn't cutting it, mosquito control services are available and can make a huge difference in reducing the prevalence of mosquitoes on your property. Biting insects can spoil a great time. By taking a few simple steps, you can make your summer evenings pleasant, not painful.
