The Finest Lawn Service Available

Turf Talk

We have been sheltering in place for longer than any of us expected; if you're like me, you're more than ready for summer to be here. COVID-19 has affected all of us in one way or another. You may have had to take time off work to care for your children, since schools were closed for the remainder of the school year. You've kept your distance from family to protect both them and yourself. We've seen movie theaters, malls, restaurants and dozens of small businesses close their doors overnight, not knowing when things would return to normal. While the world was closing all around us, I hope you had a chance to seek the good that was happening, too.

Schools began delivering meals to children through their communities. Neighbors banded together to send meals to first responders and medical personnel working tirelessly to care for patients. Donations poured into non-profits to help the restaurant community stay alive. Parades of teachers and faculty made their way into neighborhoods to share with their students how much they missed them in class. All the while, you've stood by **King GREEN**, allowing us to continue to service your property. I hope that when you look at your lawn and landscape, you realize you're supporting our local, family-owned business. You're keeping your community employed through hard times.

Thank you from the bottom of my heart for allowing us to continue caring for your lawn and landscape during this challenging time. It means more than you will ever know.

Sincerely,
Jennifer

Jennifer Jorge

Refer A Friend

Did you know that our number-one source of new customers is by referral? Most of our clients are referred by our current customers.

For each new referral that starts a **King GREEN** program, you both receive \$25 towards any **King GREEN** service. There is no limit, so you can refer as many of your friends and family as you'd like.

We'd love the opportunity to provide your family and friends with the same great service you've grown accustomed to. We are grateful that you take the time to share **King GREEN**.

Now Hiring!

We are always looking for enthusiastic individuals to join the **King GREEN** family.

Apply online at KingGreen.com.

Congratulations! Listed below are the Round 1 newsletter winners:

- Tom Marra, NC Louann Weaver, GA
- Elizabeth Ottinger, GA Katherine Wolfe, NC

Manage Your Account Online!

We want to make being a **King GREEN** customer as easy as possible.

For this reason, we have updated our website so that you can manage your account online. You can add services, schedule payments, and view your history all in one spot.

Visit KingGreen.com to access your account. Click on "My Account" in the top right corner. Once there, you can:

- Prepay for your annual services or pay current balances
- View a history of applications and recommended services

If you have been pleased with your **King GREEN** service, we would love for you to share your experience online.

About This Service

Today, we applied the early summer (Round 3) treatment to your lawn. Warm-season grasses (Bermuda and Zoysia) received a balanced fertilizer for growth and color. We also spot-treated weeds that may be present. Fescue lawns received an application of humic acid. This will help the lawn to better use the nutrients in the soil while adding organics to the lawn. Please note that, depending on your lawn's needs and environmental conditions, this application is subject to change.

The threat of disease is very high during the summer months. Extreme heat and humidity combined provide an ideal environment for diseases to develop. **King GREEN** offers both preventative and curative fungicide programs at an extra charge. If you have any questions, please give us a call.

Also, keep in mind that now is the time to aerate Bermuda and Zoysia lawns. Be sure to call or visit our website at kinggreen.com for additional information about this service. Thank you for using **King GREEN**.

DID YOU RECEIVE A TREE AND SHRUB APPLICATION TODAY?

The tree and shrub application today consisted of insecticide to control any young insects that might be hatching and a miticide to control mites on junipers and other shrubs. A fungicide was also applied that should keep your shrubs looking their best for the next six to eight weeks. You may have noticed that we don't always spray every plant each time. **King GREEN** uses only the most environmentally responsible products available. It is our policy to minimize all pesticide use. For this reason, we'll evaluate the landscape during each visit and spray only the plant material that needs spraying.

THANK YOU FOR USING KING GREEN.

Employee Spotlight

LEVI GARRETT

In this newsletter, we take a little time to get to know longtime **King GREEN** technician Levi Garrett. Levi was an experienced chemical technician when he came to **King GREEN** over ten years ago at the recommendation of another employee. Like so many other team members, once Levi arrived here, he wanted to stay.

In addition to the overall atmosphere, Levi appreciates the stability that **King GREEN** provides in terms of schedule and benefits. While **King GREEN** has become like another family to him, the career he has carved out here has allowed him to provide for his own family.

One problem for lawn technicians everywhere is an open doggy door. On more than one occasion, Levi has found himself scrambling through lawns and hopping fences, trying to escape an overprotective canine. All in a day's work, as they say.

Living on Lake Lanier, it's no surprise that Levi loves taking the pontoon boat out with friends and family. He also loves camping, fishing, and like everyone else in SEC country – football!

50% OFF
your first visit when starting
the full program.

Proud Members of:

This Is the Time for Aeration

Core aeration opens the soil surface for better exchange of air and moisture, as well as deeper penetration of vital nutrients to the root system. Spring is the time for core aeration of Bermuda and Zoysia grasses, and aeration is recommended as an annual service.

Bermuda and Zoysia are creeping grasses that do NOT require overseeding. Allow us to aerate your lawn, and we'll create thousands of growth pockets to catch water, air, and fertilizer while stimulating root development.

King GREEN's core aeration provides the following benefits:

- Improves nutrient availability
- Improves oxygen content
- Improves drought tolerance and overall health
- Increases fertilizer uptake/use
- Increases water uptake
- Reduces compaction
- Reduces water runoff
- Stimulates root growth
- Aids in thatch control
